

Dear Colleagues,

The Paediatric Occupational Therapy Department, CDAU, St. Luke's Hospital, Malta, will be organising a one-day seminar about the Sensory Profiles for **occupational therapists**. The seminar will cover the use and interpretation of the different Sensory Profiles, including the Sensory Profile, the Infant/Toddler Sensory Profile, the Sensory Profile School Companion and the Adolescent/Adult Sensory Profile. The expansive age-range of Sensory Profile products allows therapists to evaluate sensory-related difficulties in clients, from birth to geriatric. Whatever the age of the clients — infant, child, adolescent, or adult — Sensory Profile products assist with understanding the complexities of the clients' sensory processing, gathering critical sensory information related to home, school, and work, and designing strategies for managing daily life. It can be useful in a variety of settings, school systems, mental health, vocational programs, rehab clinics, wellness centers, community based programs, and long term care facilities.
